# Solar Power LED Street Light

Solar Powered Street Light systems are popular and energy saving among worldwide. The lighting kits are completely wireless and easy to be mounted. At night, Solar Power LED Street Light can automatically produce light. They are characterized by easy use and easy operation.

| Type              | TCM-50SL                                | TCM-100SL  |
|-------------------|---|------------|
| Power             | 50W                                     | 100W       |
| LED Chip Qty      | 96 PCS                                  | 144PCS     |
| Dimension(mm)     | 388*193*55                              | 484*218*55 |
| Solar Panel Power | 10 W                                    | 13W        |
| Light Angle       | 120°                                    |            |
| CCT               | 3000K-6500K                             |            |
| IP Grade          | IP65                                    |            |
| Material          | ABS+PC                                  |            |
| Light Source      | LED                                     |            |
| Led Chip          | SMD                                     |            |
| CRI               | 80                                      |            |
| Shell Color       | Gray / Black                            |            |
| Battery           | Lithium Iron Phosphate Battery          |            |
| Working Mode      | Remote control+ Human body induction    |            |
| Application       | Highway, courtyard, road, outdoor, etc. |            |

## Human Body Induction
